

BRUSHWARE RANGE

Introduction

The uniqueness of SYR's Brushware centres around the PATENTED Interchange feature which allows one single handle to be used with over 200 cleaning products from mopheads to squeegees, brooms, brushes and scrapers.

Don't make the mistake of thinking that Interchange is all about a system of cleaning tools that only needs one handle, the key to it all is the CONNECTION - The PATENTED Tuf-Ring®. This PATENTED Innovation from SYR is the heart of the system. It enables the tools that fit on the handle to be held securely and safely.

Every cleaners pet hate is fiddling with mophandles to change dirty filthy mopheads. All managers hate having to purchase scores of different handles to fit all sorts of cleaning tools. It makes training a nightmare. The Interchange Handle CONNECTS to all products in the Interchange Range. Various Interchange Handles are designed for use in different tasks. The keyword here is VERSATILITY, for example, when you're mopping the floor a stubborn patch may be present, the mophead is simply removed from the handle and a deck brush, grout brush or scraper can be screwed on (or any other tool that is required). Having removed the patch the mop is put back on and when mopping is finished then a floor squeegee is attached to complete the job properly. All this can be achieved WITHOUT your hand contacting any dirty tools. Using this system makes learning and training simple.

Brushware Materials

Nylon

A synthetic monofilament material, Nylon has excellent sweeping properties and wears well. When wet, Nylon tends to feel softer.

Polypropylene

A synthetic monofilament material, Polypropylene wears well and is light. It does not recover well from crushing. It can be used in hot water but should not be left in boiling water for more than a few seconds.

Polyester

A synthetic monofilament material, Polyester has excellent sweeping and wearing properties. Used in food processing area, hospitals and all areas where hygiene is of paramount importance. Can be autoclaved at 134°C.
